## Ruling Dictionary

### Legal (Wide) Ruling

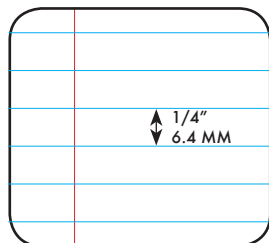

- Popular in business, K-12 school children, home and legal environment.
- Ideal for larger handwriting and ease of legibility.
- Line spacing: 11/32" - 8.7 mm.

### Law Ruling

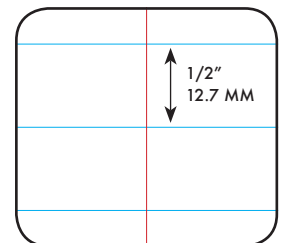

- For lawyers and others used to separate information on the left side from that on the right side.
- Line spacing: 11/32" - 8.7 mm.
- Single 3" - 7.6 mm margin from the left side of page.

### Legal (Narrow) Ruling

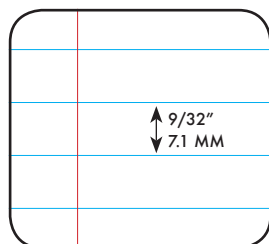

- Good for small size handwriting.
- Allows more writing per page.
- Line spacing: 1/4" - 6.4 mm.

### Legal (Narrow) Ruling

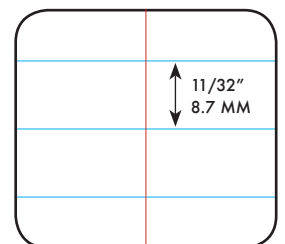

- Good for small size handwriting.
- Allows more writing per page.
- Line spacing: 1/12" - 12.7 mm.
- Single margin line down centre of page.

### Medium or College Ruling

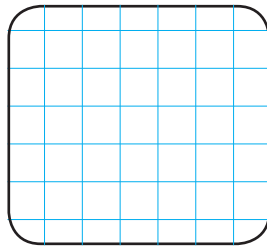

- Standard for college reports and term papers.
- Perfect for average size handwriting.
- Line spacing: 9/32" - 7.1 mm.

### Greg Ruling

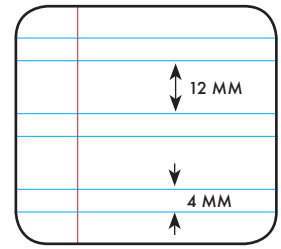

- Perfect for jotting down notes, taking dictation or writing quick memos.
- Most common steno ruling for average/small handwriting.
- Line spacing: 11/32" - 8.7 mm.
- Single margin line down centre of page.

### Quad Ruling

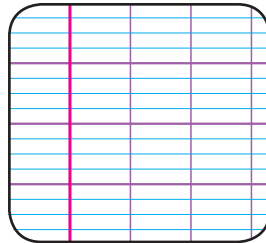

- Ideal for engineers, architects and those responsible for precise technical writing and scale drawing.
- Squares 4x4 mm.
- Squares 5x5 mm.

### English Ruling

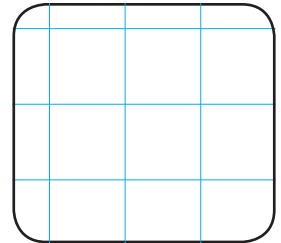

- Used to separate information on the left from that on the right side.
- Line spacing: 4 mm.

### Séyès Ruling

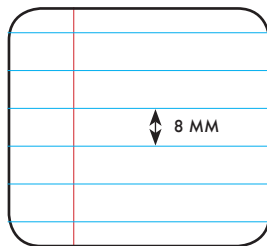

- This is the French ruling popular name in schools, "grands carreaux".
- It is useful too in teaching children how to write letters.
- It sets guides for capital and small letter (majuscule and minuscule) for where they start, end, connect, etc...
- There are 3 minor lines between two major ones.

### KG Ruling

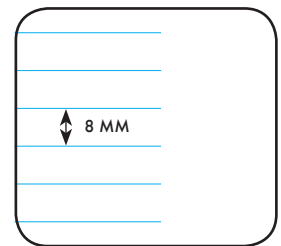

- Popular in K-12 school children, home and legal environment.
- Squares 14x14 mm.

### Lines 8 mm Ruling

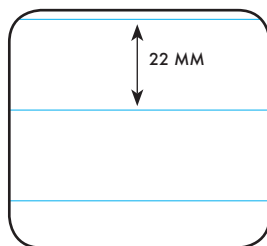

- Standard for college reports, term papers and business.
- Perfect for average size handwriting.
- 5/16" - 8 mm between lines.

### TP Ruling

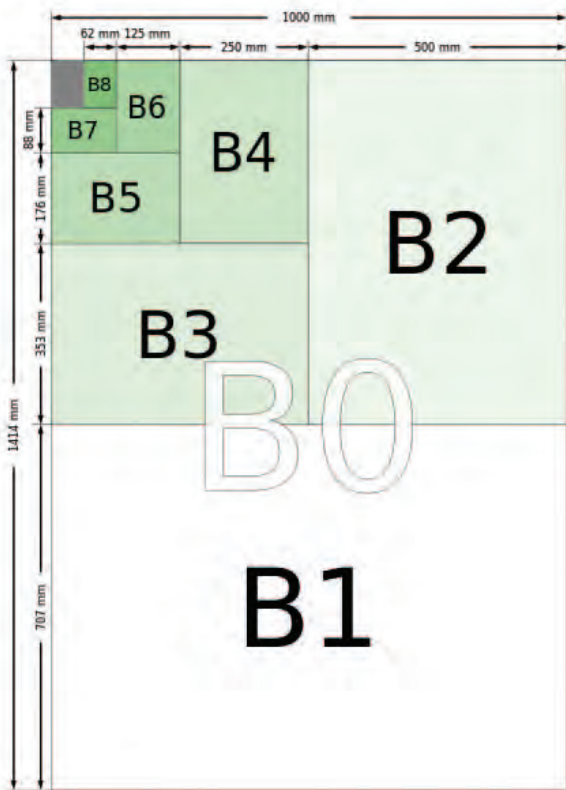

- One line page & one blank.
- 8 mm between lines.

### 9 lines Ruling

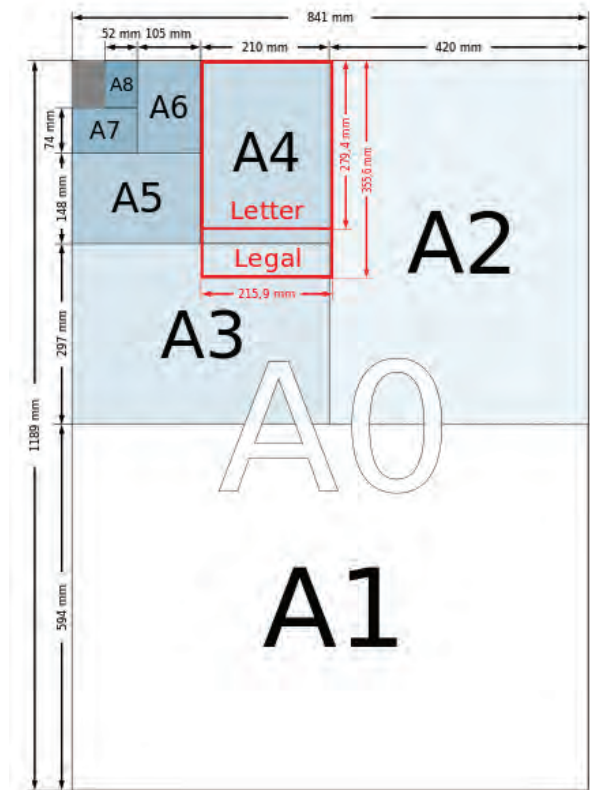

- Popular in K-12 school children, home and legal environment.
- Line spacing: 22 mm.

## Size Dictionary

Format	B series	
Size	mm x mm	in x in
0	1000 × 1414	39.37 × 55.67
1	707 × 1000	27.83 × 39.37

# THE Orange WAVE

The Orange Wave Range is a reminder of the planet's thermal equilibrium change caused by pollution and non-recyclable materials. To help save our planet, the paper used in this notebook is made 80% of bagasse (crop residues) and the black covers are made of 100% recycled polypropylene with zero waste production.

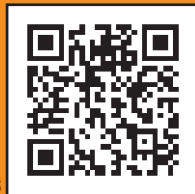

*Buying **THE Orange WAVE** products reflects your environmental awareness.*

# JOIN THE GREEN REVOLUTION

## Eco%

For many long years, the manufacture of paper has grown to be a burden on our planet due to the threat it forms on the exploitation of our forests and trees. Fortunately, some manufacturers started realizing that agricultural waste can be used in the production of bagasse paper using different materials such as sugarcane residues.

**MINTRA®**, through its **Eco%** range, not only does it encourage the use of agricultural waste over the use of trees, but it also brings to the awareness of its customers the importance of preserving our one and only PLANET.

### Why Eco%?

- The paper is made of sugarcane plant renewable waste fiber.
- Trees are being saved by using these untraditional materials.
- ZERO waste polypropylene production.

### What are the GREEN attributes?

- Paper is made of 80% sugarcane fiber.
- Sugar Cane fiber content is 68% of the total product.
- Water based inks are used.
- Poly cover is made of 75 % recycled material.
- Pen is made from 76% PLA and is 100% biodegradable.

### Eco friendly pen using PLA... What is PLA?

**PLA** is a biodegradable plastic, made from natural plant not petroleum. Under conditions with a temperature between 56-60 degrees and humidity levels of 80% to 90% which is a high percentage, the PLA product will decompose into the earth within 60 to 90 days. Advantage: Biodegradable, endless supply, economical and independent from petroleum cost.

**Eco%** MINTRA®  
**Notebook**  
Papers & ECO PEN

MINTRA® provides a green rating system to help you quickly find products with the level of environmental attributes you seek. Third party ecolabels you seek with a dark green rating reflect our best choices.

80% sugarcane fiber as a percent of product	ECO 68%
68% sugarcane fiber as a percent of product	ECO 68%
75% recycled cover recycled content	ECO 75%

Reduced Harsh Chemicals  
Non-toxic soy or water-based inks on paper & packaging

**ECO PEN**  
76% PLA

Our shades of green rating system are designed to help you quickly find products with the level of environmental attributes and/or third party eco labels you seek.

**Bio-based:**

- Sugar cane fiber as a percent of paper .....80%
- Sugar cane fiber as a percent of total product.....68%

**Recycled**

- Post consumer recycled content .....5%
- Total recycled content .....10%

**Reduced Harsh Chemicals:**

- Non-toxic soy or water-based inks on paper & packaging.

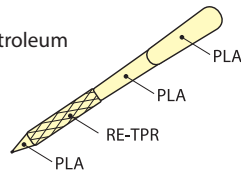

**Recyclable: (where facilities exist)**

- Paper and Grey board back cover.....paper recycling bin
- Polypropylene cover and Pad Holder...plastic recycling bin.

**ECO PEN 76% PLA**

- Made from plant starch not from petroleum
- 100% Biodegradable PLA made clip, tip and barrel. The PLA materials in this pen are OK Compost-certified and conform to EN 13432.

- Available in different sizes.
- Includes eco friendly pen.
- Double wire.
- Available in 5 assorted colors.
- 70 gsm bagasse paper.
- Ruling: Lined 8 mm.
- Perforated paper.
- Pocket Clear dividers.
- Personal data on first sheet.

MINTRA®

# ECONILE®

## A Journey Towards

### Sustainability

When Ancient Egyptians started making paper, they used "Papyrus" which is a plant that grew almost exclusively in the region of the Nile Delta in Egypt. 5000 years later, MINTRA continues to follow this practice by using Bagasse paper made of sugarcane residues to create its Econile range of notebooks and pads. Once the sugarcane is crushed to extract sugar, the remains are collected by a factory in Upper Egypt to transform the residues (Bagasse) into a pulp that is later on transformed into paper. Using this kind of paper in its production, MINTRA is making use of its heritage as well as contributing in considering a smart alternative to the destruction of forests to make paper.

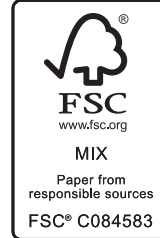

Quand les égyptiens de l'époque antique ont commencé à fabriquer le papier, ils ont utilisé le Papyrus, une plante cultivée uniquement dans la région du Delta du Nil au nord de l'Égypte. 5000 ans plus tard, Mintra poursuit la même pratique en utilisant la Bagasse, papier fabriqué à partir des résidus de la canne à sucre, pour créer Econile, sa gamme de cahier et de bloc-notes. Une fois la canne est broyée pour en exclure le sucre, les résidus, recueillis dans une usine en Haute Égypte, sont transformés en pulpe pour fabriquer le papier. Utilisant ce type de papier comme base de ses produits, Mintra non seulement profite de l'héritage culturel du pays mais propose aussi une solution intelligente pour éviter la destruction des forêts.

MINTRA®

BECAUSE...  
GREEN PLANETS ARE HARD TO FIND!

**ECONILE®**

**ECONILE®**

- Available in different sizes and rulings.

**Cover**

- Rigid cover.
- Envelope paper pocket.

Plastic Binding  
Double Wire Binding  
Mintra Covers

## Minibind Thermal Binding Mechanism

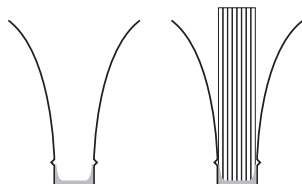

Binding Length:	33 cm
Binding Width:	20 cm
Binding Capacity::	Up to 250 sheets
Binding Speed:	10000 sheets/hour
Power:	300 watts
Voltage:	220 volt , 50 Hz
Weight:	1.5 kg
Mechanism Dimension	20x50x16 (BxDxH)
Built-in Cooling Rack	

## Thermal Binding Cover

- Our thermal binding covers are one-piece covers with a strip of hot-melting glue placed in the spine area.
- Your sheets are inserted into the cover and thermal binding mechanism.
- We offer covers with a clear front and different back textures.

Covers have pre-scored, adhesive spines. When heat is applied, the adhesive softens and secures each individual sheet, ensuring a strong and long-lasting bind.

## Laminating Pouches

### Laminating Pouches

- Put a lamination cover on your cards, photos and your other important documents to protect them from curling, mis-folding and humidity.
- Just insert your object inside the plastic cover and then into the laminating mechanism; your object is ready now.
